OVERVIEW OF TFAB RECOMMENDATION:
Undergraduate Tuition 2020-2021

Current students
All existing resident and nonresident undergraduate students would have locked tuition increases of 3% per year for up to four years.

Historical tuition increases
- 10-year average annual tuition increase for resident students has been 5.4%
- 10-year average annual tuition increase for non-resident students has been 4.3%

New students 2020-21
TFAB is recommending a guaranteed tuition program that would give new students fixed tuition rates for five years. For 2020-21, tuition would increase for new students only by:
- 10.75% for new resident students
- 7.5% for new nonresident students
Tuition for that student cohort would then stay locked at that same rate for five years.

Future students
Tuition rates for subsequent new student cohorts would be set every year following the established tuition review process by the Tuition and Fee Advisory Board (TFAB), as well as public forums, community input, presidential review, and final approval by the UO Board of Trustees.
